GIS for everyday life

London 28 - 30 October 2008

ESRI (UK) is proud to announce that we will be hosting the **ESRI Europe, Middle East and Africa User Conference 2008** from the heart of London's Westminster.

GIS impacts every aspect of your life

GIS is a powerful technology that has quietly changed the way people view and live in their neighbourhoods, towns and cities. ESRI GIS solutions help people solve real world problems. Many people remain unaware of GIS and its impact – an impact that is as wide ranging as it is valuable – despite GIS having grown immensely in the last 15 years, despite hundreds of thousands of people now using the technology, and despite it affecting the daily lives of millions. The 2008
